NEMATOLOGY LITERATURE LIST

1974

By Virginia Harrington[1/]

This list records 752 publications reviewed by the Nematology Laboratory (formerly Nematology Investigations) during the calendar year 1974. Fourteen headings divide the list according to subject matter. Each reference has been listed only once, under the category considered most appropriate.

Most citations were indexed from the original publications or reprints forwarded to us through the courtesy of the authors. Others were indexed from journals of abstracts, while a few were listed from the bibliographies and literature citations of published papers.
